RELEVANT EXPERIENCES

Off-campus

- June, 2018 ~ September, 2018
UX/UI design summer intern, KCSYS Inc, Taichung, Taiwan
Worked with team to design websites, experiencing from Functional Map, UI Flow, Wireframe, Mockup to Prototype
- June, 2016 ~ September, 2016
Volunteer, Lee Women's Hospital, Taichung, Taiwan

On-campus

- September 2018 ~ June 2019
 - ✓ During courses of Medical and Life Health Product Design, I created an interface via app connecting rehabilitation equipment, which made the equipment friendly to use and the patient's usage records traceable.
 - ✓ During course of Interface Design I developed interesting designs such as,
- by soil detector, I created an interface for Plant-to-Human communication app.

- by utilizing the MIT app inventor, I created a car-finder app.
- by orientation sensor, I created some oriented games.
- by accelerometer sensor, I created a pedometer app.
- ✓ Taiwan Craft Research and Design Project (held by National Taiwan Craft Research and Development Institute): Won sponsorship and selected working with the master of traditional craft to make a series of woodworking works
- September 2017 ~ June 2018
 - ✓ Winner of Asia University Talent Youth Design Project: My work is a night light combining technique of mechanism, electronic and art design called "Return". This contest was from concept design, 3D modeling, prototyping, mold making, production to commercialization. Not only did my works win the honor but also were displayed on the shelf at Asia University Museum of Modern Art as an article of commerce for sale.
 - ✓ Member of Asian University International Design Elite Team: To participate Red Dot Design Award and iF Design Award contest. The design of flying flag for Olympics Games was qualified as a finalist for Red Dot Design Award 2018 final.
 - ✓ College Student Research Creativity Award 2018 (held by government of Ministry of Science and Technology): A research paper "*Apply Orange Technology to slipper design for eldercare*".
- September 2015 ~ June 2016
 - ✓ TA, Assistant to Professor Dr. LUNG: To edit foul copy of "*Human Factor Engineering and Design*" till being new book to publish.
 - ✓ Vice Student Representative of the class: To manage the class affairs

COMMUNITY INVOLVEMENT

- June, 2016 ~ September, 2016
Hospital Volunteer: Lee Women's Hospital, Taichung, Taiwan

COURSES OF MEDICAL AND LIFE HEATH PRODUCT DESIGN SPECIALIZATION

- September, 2015 ~ June, 2019
Asia University / China Medical University
Interdisciplinary Medical and Life Heath Product Design Program
Courses included: Ergonomic, Human Factor, Medical Product for Rehabilitation, Design and Evaluation on Sport Equipment, Innovative Biotech Industry, Medical and Life Heath Product Design, Product Design for Humanistic Care in Nursing, Design Engineering. I earned total 18 credits.
